

Shift gears smoothly

With KAMAS, you'll never have to limit your project to just text, just data, just programming, popping diskettes one at a time. The minute you insert your single KAMAS diskette, you have all three functions well in hand—and more. Need word processing? The built-in text editor gives you many features of a full-function word processor. Plus you get high-speed text retrieval and a built-in remote capability that lets you operate KAMAS via modem. Would some calculations or programming speed the job along? The KAMAS programming language can handle it, letting you cruise along in high gear in the integrated KAMAS environment.

Get a handle on unlimited power

KAMAS programmability lets you open the hood to extend and customize your system. Of course, you needn't be a programmer—or do any programming—to use KAMAS. But its high-level programmability is such a simple and temptingly powerful benefit that you'll probably find yourself fine tuning it in a short time. With its built-in data types, dynamic type checking, streamlined control structures, and compact, threaded code, the KAMAS language can help you get a grip on the most demanding—and fascinating—tasks.

KAMAS™. Designed to go the distance.

- ☐ Outline Processing
 - ☐ Information Retrieval
 - ☐ Word Processing
 - ☐ Telecommunications
 - ☐ Programming Language
- It all adds up to Knowledge Processing.

Integrated into one program!

Price: \$175.00

System Requirements: Z80* computer with 56K RAM and at least two disk drives (minimum 160K each). CP/M*, Version 2.2 is also required. In addition, an 80 x 24 character screen, a printer, and an RS232 modem port are recommended.

Formats: Preconfigured versions are available in a variety of formats for a growing number of popular Z80 personal computers. Ask about your computer.

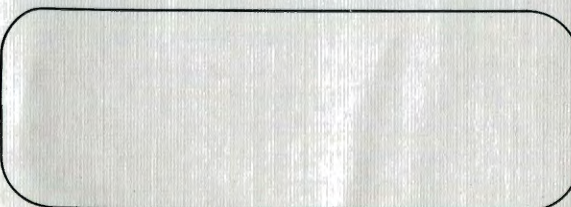

Ordering Information: The complete KAMAS package is \$175. See your dealer, or order direct from Compusophic Systems.

- ☐ Send a check or money order, payable to Compusophic Systems, along with your name and complete shipping address.
- ☐ MasterCard or VISA accepted. With credit card orders, please include the card's account number, billing name, address, and expiration date along with your signature.
- ☐ To order by phone, call (503) 649-3765.

For a preconfigured version of KAMAS, be sure to specify the name and model of the host computer.

KAMAS™
Knowledge And Mind Amplification System.

the classic vehicle

Designed to go the distance

The very best personal computer software, like the other good things in life, derives from a single timeless quality. Fine design. The riveting appeal of the most ordinary elements combined in a most extraordinary whole.

In the tradition of innovative craftsmanship, Compusophic Systems has created KAMAS™, the Knowledge And Mind Amplification System.

More than a software tool that leverages your strengths, more than a precision instrument that applies them with finesse, KAMAS is a productivity vehicle that amplifies your own creative power.

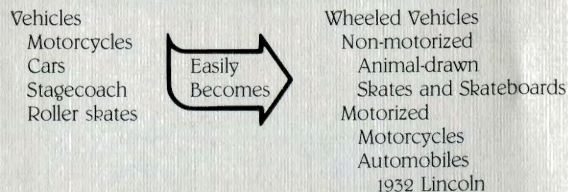

It's a skillful blend of some very familiar productivity tools. And some dynamic new ones. Outline processing, information retrieval, word processing, communications software, high-level languages—they all come together in KAMAS. Along with the one key element that drives all the rest. You.

With its uniquely refined power, KAMAS gives you full control over the features you want to use. Lean hard on some, go light on others. Move at your own pace, in your own style. Head out in a new direction. Wherever your work takes you, KAMAS lets you create, organize, express, transmit, achieve your ideas.

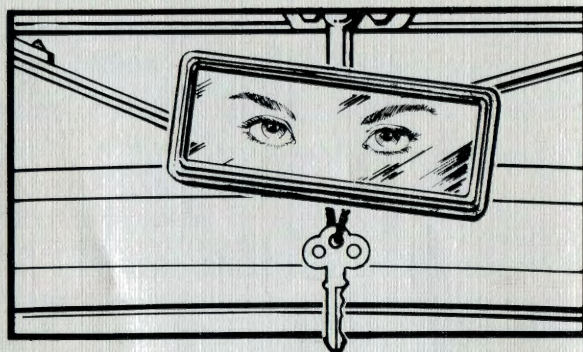

KAMAS is more than just a way of getting from the start to the finish of a job quickly. It's a way to enjoy getting there. KAMAS is the smarter, more comfortable way to go.

Structured text is the key

KAMAS lets you arrange ideas into an electronic outline. Integrate your ideas by combining them into a single, general idea. Differentiate them by splitting a general idea into several specific ones. Revise their names.

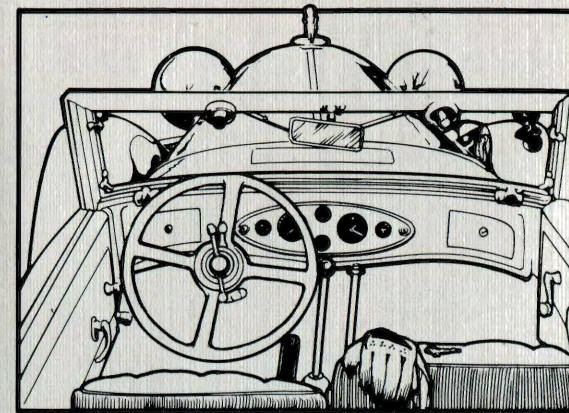

You can express, then reorganize your ideas at will. Quickly. At any level. If you move a title, you move all the text and subtitles attached to it automatically. This revolutionary kind of personal computing, known as outline processing, does for concepts what spreadsheet programs do for numbers. KAMAS lets you create and revise the structure of your ideas in addition to the textual content. KAMAS makes it all so simple that it's easy to start up and use. And easy to keep using.

Keep sight of where you are

KAMAS outline processing takes you as far as your mind's eye can see. And back again. At any time. At any point in your work. As you map out your ideas, you can stop along the way and look—or move—in any direction. Pursue one avenue of thought, then cut across to the middle of another. Survey the "idea neighborhood" and make changes wherever you like. Hide the details and deal with your main ideas. Then, take care of the specifics when you're ready. KAMAS commands make it easy for you to see where you've gone with an idea **before** you decide where you're going next.

KAMAS™ is user-driven

To be truly productive, a software vehicle must be more than just user-friendly. It must be user-driven. Responsive. Powerful. So comfortable, so familiar that it becomes an extension of the person using it.

With KAMAS, **you're** in the driver's seat.

KAMAS™ fits like a glove

Unlike menu-driven systems that force you to pick and choose among fixed functions with fixed names, KAMAS is completely flexible. On the one hand, you can structure outlines into your own system of menus. The titles automatically become the menu choices. And, on the other hand, you can access outlines by commands. Just group operations you normally use together, then give the group a name that's easy to recall. Your new command becomes an integral part of the KAMAS vocabulary. You can start work quickly, with the personalized functions you need at your fingertips.

KAMAS™ steers you straight

KAMAS is highly interactive with a friendly, multi-level system of on-line help.

With KAMAS, you'll also receive *The KAMAS User's Guide*—the comprehensive manual that contains a tutorial, reference manual, application notes, glossary, bibliography, and index—*The KAMAS Report*—12 free issues of news, application ideas, and more—plus discounts on upcoming add-ons for the KAMAS system.
