The MicroPro Software System™: more solutions for less work.

CalcStar is a remarkably powerful product by itself. And you can combine it with other MicroPro products to form an exceptionally versatile system of business solutions—which we call the MicroPro Software System. The Software System enables you to use your microcomputer to its fullest with less time and effort.

For example: With **DataStar**™ you could maintain a mailing list. With **SuperSort**™ you could select certain addresses from the list. Then with **WordStar**® you could draft a letter, and with the **SpellStar**™ option make it letter-perfect. Then you could insert part of a **CalcStar**™-prepared ledger sheet into the letter. Finally, with the **MailMerge**™ option, you could print the letter, personalized for each name on your list.

Ask your MicroPro dealer to show you these and other MicroPro products. When you buy one MicroPro product, it's just the beginning of the problem-solving power we can put at your command.

The company behind the software.

MicroPro International Corporation is a leading developer of business software for microcomputers. Founded in 1978, MicroPro has enjoyed phenomenal success by producing software products that are innovative, simple to use, remarkably versatile, and capable of working together to multiply their problem-solving power. MicroPro software is sold by more than 1,200 dealers in the United States and 27 other countries.

MicroPro's word processing program, WordStar, introduced in 1979, is the company's most successful product so far. WordStar now ranks as the best-selling word processing program for microcomputers, in number of units sold in retail stores in the USA.*

MicroPro is committed to developing an expanding family of powerful and easy-to-use software that meets the complete information-processing needs of business.
